Ricky	Johnson	Recently, the University Police had their dispatch workspace converted to an adjustable-height desk. With the amount of cords and systems in place, it would be very difficult and time consuming to remove all the items from the desk to have the conversion take place. With the help of Jim Luther, Kira Fritsch, and especially Tim Banker and Brian Krueger, this installation happened very quickly and efficiently. Tim and Brian were creative in their approach to a problem and both demonstrated their expertise. Often these tasks are behind the scenes and under-appreciated, so I want to thank our Facilities Management and Buildings and Grounds staff for their continued hard work and creativity.	07/27/16
Dana	Hartel	It was a pleasant surprise during lunch today to find that the wooden picnic tables between Radford and Clow had been cleaned of the layer of the mold and mildew that gathers with age. Thank you to whoever cleaned them!	07/18/16
Chrissy	Lambie	I want to compliment Alicia Stuedemann for taking initiative for helping a visiting student during Preview. Alicia noticed the student crying in the parking lot and approached her and asked if she could help her get her where she needed to be. Alicia escorted her to check-in and waited to help get her to her first session. Good job Alicia for going above and beyond in recognizing a student in distress and offering help.	07/12/16
