Anne	Murphy	<p>Bob Veltus came by early Thursday morning for a work order about our office being cooler than usual. We have the normal office full of staff who either love it a little cooler (me) or like it a little warmer (several others). He came in with a bright attitude and determined our office temps with his handy laser tool and really informed another staff member and me about how the heat/air works in our building. We learned that it's quite an elite (ie; antiquated) system with several constraints to keeping everyone happily content in their work areas but he was determined to do his best. It was quite enlightening and he was extremely personable and we appreciated the time he took to explain and then fix our problem. Bob made our workplace a little more refreshing with his sense of humor and knowledge of the heating system and I wanted to let him and everyone else know. Thank you Bob!</p>	9/8/16

Renee has been such a huge help in supporting many areas of our department, from our admissions process, updating the website, fielding questions from students, and everything else she does. She is such a vital part of our office and I just want her to know how helpful she is.	9/9/16
Alicia Johnson	Liz Cannon has been a great mentor for me as I continue to transition into my role as Director of the Women's Center. And what better mentor could I ask for than the person who first started the UWO Women's Center? It's easy to identify the deep impact Liz has made on campus and in the community. Thank you Liz!	9/9/16

Cindy Lou	Schultz	I have always appreciated all of the hard work that Ricky Johnson and his crew have done over the years managing our Journalism labs, even though I have not verbalized it enough. I KNOW what they do is not easy! I have a whole new love and appreciation for Ricky! I wound up cleaning two of our labs, pulling out one set of computers, putting the others in the core lab, crawling on the floor unplugging and pulling the old power cords and plugging in the new ones. This is truly manual labor in addition to the mental labor that these folks utilize every day to keep ALL of our computers running for us! THANK YOU for all you do. YOU all are the BEST!!!!	9/22/16
